

Join Us for our Grand Opening!!

After four years, through demolition, redevelopment and renovation we are proud to announce McMaster Innovation Park's (MIP) Grand Opening with its first building, 175 Longwood Road South. The 180,000 square foot facility is opening its doors to everyone interested in taking a look.

Our event on October 26th will be a celebration of past, present and future accomplishments, delving into the history of our site and how it has been used for a centre of innovation since 1913.

7:30 am to 3:00 pm – Open House - Doors are open to the public for tours. During this time the following is available:

Building Tours – Everyone is welcome to tour the building individually or in one of our guided tours. Staff guiding the tour have knowledge of the building, its history and will be able to enter research offices where the real work is being done.

Refreshments - Please join us for light refreshments throughout the Open House.

Historical Review and Future Plans – Our new conference facility will house a historical retrospective of the site and Westinghouse in Hamilton, along with information on MIP's future plans to return this site to a centre of innovation.

“Art in the Workplace” - 30 artists with over 100 pieces from around the Hamilton region have been gracious enough to offer their art to be displayed at MIP. Our event will highlight the start of our “Art in the Workplace” program where MIP tenants have input into the artwork they see in the building.

Tenant Displays – Visit our tenants displays located in our new Atrium. Throughout the day displays will be available to review the different research projects and new products our tenants develop.

12:30 pm Ceremonial Cake Cutting - Meet Zach Douglas, MIP's President and CEO who will be on hand to cut the grand opening cake and talk about our future plans in an informal setting.
